Diagnostic Tip of the Month

Diagnostic Tip of the Month Forceps Tip

Deborah Schneider
University of New Hampshire
Plant Diagnostic Lab,
UNH-PDL

To protect the tips of forceps, slide one side of the forceps over the edge of a beaker and store the forceps the edge to keep the tips from getting bent.

Interested in submitting a diagnostic tip of the month? Contact Gail Ruhl (ruhlg@purdue.edu)

Training and Education

First Detector Training for the Master Gardener - Contributors Needed

In 2008, the NPDN education and training committee formed a workgroup to develop educational materials to train master gardeners as first detectors. The committee has identified key regulatory, quarantine and emerging pests, diseases and weeds of interest to master gardeners with an emphasis on issues of landscape ornamentals from each of the five NPDN regions.
